Palgrip®

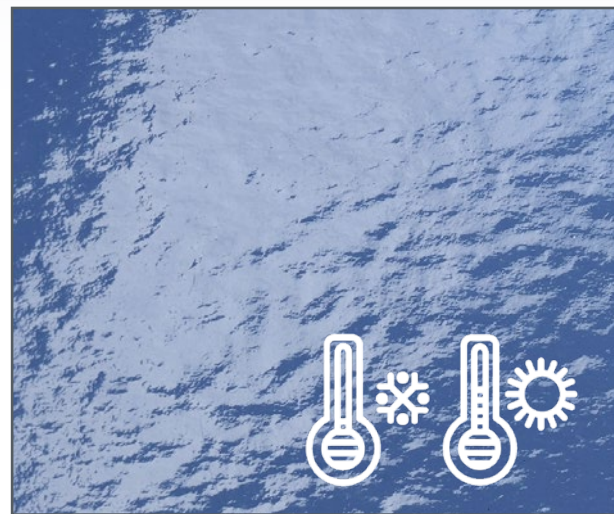

Ready for all challenges.

Quality, the best value.

Non-slip, safe, reliable.

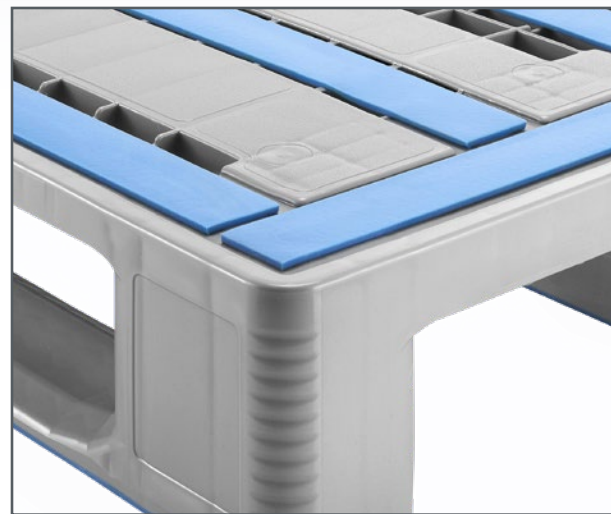

Original **Palgrip**® pallets from Craemer offer unparalleled smoothness and tracking on roller conveyors or chain conveyors. The abrasion-resistant anti-slip plates provide excellent slip resistance on the deck or under the runners. The high quality **Palgrip**® grain structure ensures an absolutely secure hold even in damp conditions. Palgrip provides an all-round reliable solution to your logistical requirements. **Only available from Craemer.**

The **Palgrip**® anti-slip coating is resistant to cold and heat, from -30°C to +40°C.

Compared to common plastic surfaces, Craemer **Palgrip**® anti-slip sheets offer absolute slip resistance even in high humidity thanks to their high quality grain structure.

The unique **Palgrip**® anti-slip panels are made from high quality HDPE and are permanently part of the deck...

...the anti-slip runners will last the lifetime of the pallet.

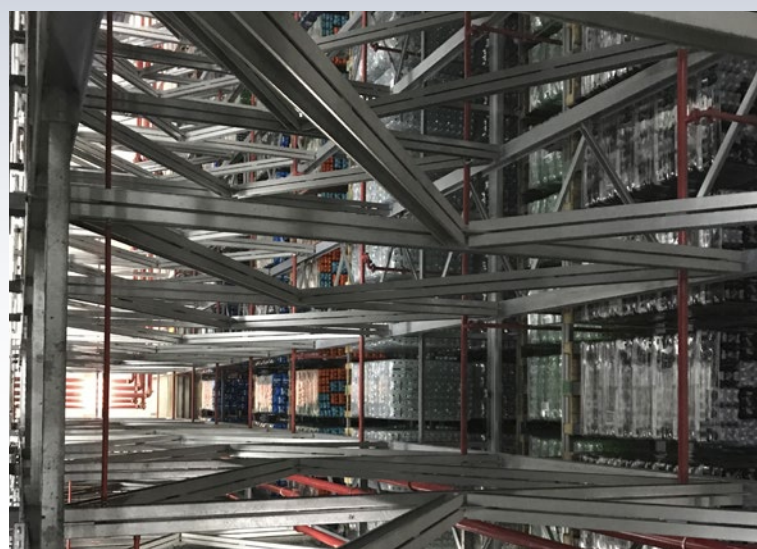

Even in an inclined position, your load remains static on the pallet deck.

Palgrip Ready for all challenges.

On turntables

In the high rack

On roller conveyors

On chain conveyors
